

“SOLUTIONS DRIVEN, RESULTS ASSURED”

A Gexpro Services Company | Gexpro
Services

Cembre is a top manufacturer of electrical connectors, crimping and cutting tools, railroad products, and identification and labeling systems.

Smart, scalable, and efficient connectivity solutions across your electrical infrastructure.

Integrated panel management solutions include wiring ducts, DIN rails, fiberglass enclosures, and panel management components. IBOCO offers a comprehensive system tailored to panel builders' needs

Control cabinet solutions include DIN rail terminal blocks, safety components, interfaces, remote I/O systems, and industrial connectors.

Electrical components, including circuit breakers, industrial enclosures, terminal blocks, push buttons, and safety switches, designed for industrial and commercial applications.

Founded in 1954, Finder has focused on producing high-quality products. Today, it offers over 12,500 items, including industrial relays, miniature and ultra-slim relays, power relays, contactors, fans, timers, surge suppressors, relay sockets, and accessories.

Offers a comprehensive range of electrical products, including connectors, enclosures, cable protection, power distribution, and wire management solutions, designed to enhance efficiency and reliability in industrial and commercial applications.

Provides innovative electrical solutions, specializing in high-quality plugs, receptacles, power distribution systems, and custom electrical products for industrial and commercial applications.

Cables and Assemblies. Benefit from 50 years of expertise in Ethernet connectivity, power supplies, and innovative automation solutions.

Comprehensive wiring and cable solutions for all machinery and control systems.

Low voltage industrial control products.

Enclosures and climate control solutions

Pilot devices and cam switches include 22mm and 30mm pushbuttons with excellent modularity, allowing numerous combinations with minimal components.

Low voltage power distribution solutions feature FLEXIBAR, copper and stainless-steel braids, DIN rail profiles, and distribution blocks. The ERIFLEX system offers space-saving components for electrical panels.

Cable protection systems, including conduits, connectors, cable glands, accessories, and custom electrical assemblies.

Limit switches, micro switches, illuminated push-button switches, key lock switches, foot/pedal switches, sockets, and terminal blocks.

Cables, wires, cable harnesses, and temperature measurement tools.

Industrial electrical safety products

Electrical controls, including contactors, motor starters, circuit breakers, relays, and automation solutions, designed to enhance efficiency and reliability in industrial and commercial systems.

Power resistor products

Products that protect, control, and provide sensing on your electrical distribution system.

Motor control solutions, contactors, overloads, motor starters, and LV/MV circuit breakers.

Relays and monitoring solutions.

Switches, metering, and monitoring solutions include non-fused load break switches, fused disconnect switches, manual transfer switches, multifunction power meters, and load break switches for photovoltaic applications.

Advanced power quality solutions include active and passive harmonic filters, drive output filters, and line reactors for AC and DC drives.

Wide range of steel products, NEMA enclosures, fittings, wiring products, ventilation fans, weatherproof solutions, and lighting products.

Broad line of tapes, films and heat shrink products for the electrical and electronic OEM's.

Cable support systems, certified in accordance with the European DIN IEC 61537 and the North American UL and CSA standards.

Fiberglass, Polycarbonate & PVC electrical instrumentation enclosures

Electrical Enclosures – non-metallic

Terminal Blocks
